Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 2, 2008 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Upon closer scrutiny, with regard to claim 1 (lines 9-11) as well as claim 4 (lines 11-13), the phrase "said free magnetization layer is an amorphous ferromagnetic material that is made of an alloy of an iron group element and metalloid elements, rare earth elements and valve metals," is vague and ambiguous. More concretely, it is unclear as to whether the free magnetization layer is made of an alloy that must include at least all the listed materials (i.e., must include an alloy of an iron group element, and also metalloid elements and also rare earth elements and also valve metals, or is perhaps supposed to

include at least one of the listed materials (i.e., selected from at least one of the group consisting of an iron group element, metalloid elements, rare earth elements and valve metals) or perhaps some other intended groupings or sub groupings of the materials selected from an iron group element, metalloid elements, rare earth elements and also valve metals.

Thus the scope of the claims cannot be readily ascertained.

Additionally, since claims 2, 3, 5 and 6 depend directly or indirectly from claims 1 and 4, they too are thus rejected under the second paragraph of 35 U.S.C. § 112.

The Examiner has made no prior art rejection of claims 1-6 because the subject matter encompassed by the claims must be reasonably understood without resort to speculation. Presently, speculation and conjecture must be utilized by the Examiner and by the artisan inasmuch as the claims, as presently drafted, do not adequately reflect what the disclosed invention is. Note *In re Steele*, 305 F.2d 859, 862, 134 USPQ 292, 295 (CCPA 1962) (A prior art rejection cannot be sustained if the hypothetical person of ordinary skill in the art would have to make speculative assumptions concerning the meaning of claim language.); Note also *In re Wilson*, 424 F.2d 1382, 1385, 165 USPQ 494, 496 (CCPA 1970).
